Good day

Please refer to attached pictures of the air quality today 5/3/18.

I tried calling Ben Nacenzi @401.231.4000, he's out today

Called Richard DelFino, no answer and can't leave any voice mails at # 401-481-1247

Called Anthony Verardo @ 401-369-5657 and left a vm to please call me back on the air quality today

Please see pictures 46,44,42,40 showing bearings that are sitting on the bench & piston's that are in the engine with the auto fluff / debris all over them,

Picture # 48 shows the smoke with horrid stench being omitted from the shredding plant

My tech's are all scratching and having problems breathing and we now have to close the doors on the hottest day of the year

Please advise

Thank you

Armand Watts
